

## **TPMGC Player Selection System**

The primary purpose of the TPMGC Player Selection System (PSS) is to select players for a tournament at the Torrey Pines courses when an event is oversubscribed. The system is designed to give each member a fair opportunity to play in club tournaments. Normally, this will mean that a member who signs up to play will not miss more than one event in a row. The system uses an Excel based process with templates, embedded formulas and macros (mini-programs). TPMGC Board members and other designated member volunteers as identified by the board will be given first preference in assignments to events. Waitlisted TPMGC members who remain on the waitlist through the last corresponding Torrey Pines event (Weekend to Weekend and Weekday to Weekday) will be given second preference in assignments to events. TPMGC members who did not sign up for the last Torrey Pines corresponding event will be given third preference for assignment. TPMGC members who played in the last Torrey Pines corresponding event, or who were selected on the original tee sheet but later cancelled, will be given fourth preference for assignment into the next Torrey Pines event. Members who have three or more incidents of slow play will be assigned later tee times. Members who are on penalty status because of a prior no-show or late cancellation will be removed from consideration for the tee sheet.
