

Initial Member Login

Initial website login may only be accomplished by TPMGC members using their official club email address (this is the address members provided to SCGA when they became a club member and the address used by our club for all member communications).

After initial login, members will be instructed to set their member password for all future logins. **Members do not have the ability to change their website email address or username.** Usernames are automatically set by using member's first-name initial and last name. If there are more than one member with same first initial/last name then "-1", "-2", etc will be appended to username.

To perform initial login, go to TPMGC.org and select **1** "Member Login" in upper right of the home screen then select **2** "Lost Password" within the box displayed in middle of the screen. In response to this selection, the member will receive an email with a link and instructions on how to set one's password.

After successful login, the website home screen will display **3** an additional menu bar containing member-related menu items and **4** the member's username will appear beside ACCOUNT in the upper right area of the screen.
