

## Add or Delete Members in Signup Group

After a member signs up for a tournament, his group will appear on the tournaments signup sheet. If he signed up as a single only his name will appear as a group member. If other members were signed up then they also will appear as members of the group.

After a group has been signed up for a tournament, no member in that group has the capability to change group members (either by deleting or adding members). A member may cancel his entry after website logon but may not cancel/add other group members.

**TO ADD OR DELETE OTHER MEMBERS IN SIGNUP GROUP:** The only method to change the members in a group appearing on the signup sheet is for each member in the group to individually logon and delete their tournament entry. After all members in the group have been deleted then one of the members may resubmit the signup request to include or exclude members in the previous signup. This can be done any number of times (all members delete their entries and a new signup group submitted) as long as the signup period is currently open.

For detailed instructions on how to sign up or cancel from a tournament see the following FAQs
